Pa·ddle-wheel. [See Paddle *sb* 1 3.]

1 A wheel used for propelling a boat or ship as originally tried, consisting of or having a series of paddles or paddle-like spokes inserted in an axle, drum, or wheel, whence the name, but, eventually, having floats or paddle-boards fitted more or less radially round the circumference so as to press backward like a succession of paddles against the water. These wheels rotate on a horizontal axis, so that only the lower paddle-boards are under water, they are generally arranged in pairs one on each side of the vessel, in river steamers, sometimes single and placed in the stern

Petty called his suggested wheel with actual paddles a paddle wheel; but the term was app ar nded by the inventors and theorists of the 18th c who wrote simply of the wheel or water wheel; rowing wheels, revolving oars etc. And at the eventual employment of the wheel will fi at boards instead of paddles the name paddle wheel was at first felt to be inappropriate, but it gradually can e in after 1815.

(*Note* The word in the preceding senses is known only in English, and in the Anglo-Latin *pagina*. The two main early senses were 'scene' and 'stage' of a play, and 'stage on which a scene is exhibited or acted.' The relative order of these is not certain; but, so far as instances have been found, the sense 'scene' appears first. The Anglo-L *pagina* is in form identical with the known ancient L *pagina* leaf (of a book), Page *sb* 1, and it is noteworthy that from *pagina* French had, beside the popularly descended *page*, a literary form *pagine, pagene*, 'page of a book', which also came into Eng in the forms PAGINE, *pagyne, pagyn*, and even (in 15th c) *pagent*, forms which are identical with some of those of *pageant* There is thus no difficulty so far as concerns *form* in identifying *pagina* 'pageant' with *pagina, pagine, pagyn, pagent*, 'leaf' or 'page And it is easy to conceive how the sense 'page' or 'leaf' of a MS play, might have passed into that of 'scene' or 'act', but direct evidence connecting the two has not been found On the other hand, some, who take 'stage as the earlier sense, have suggested for *pagina* a possible passage of sense from 'tablet or slab (for inscription) to 'board', and so to 'stage'; or have seen in the 14–15th c Anglo Latin *pagina* a more

or less independent formation from the stem *pag-* of L *pangĕre* to fix, cognate with L *compāges*, *compāgo*, *compāgina* 'fixing together', 'joining', *compāgināta* 'fixed together (whence perh 'framework'); or have thought it a representative, in some way, of L *pēgma*, Gr πῆγμα 'a framework fastened or joined together', spec 'a movable stage or scaffold used in theatres This last exactly gives the sense of *pāgina*, 'pageant', and not only has Du Cange examples of med L *pēgma* as 'a wooden machine on which statues are placed', but Cotgrave has F *pegmate* 'a stage or frame whereon Pageants be set or carried' Thus it is indisputable that 'pageant' in the sense 'stage' would exactly render L *pēgma*, and it is further true that the stem *pag-* of *pāgina* is cognate with πηγ- of πήγνυμι but of any actual historical relation between the forms of these words, or any passage of *pēgma* into *pāgina* in med L, there is no trace. It had been supposed that an earlier Anglo L example of *pāgina*, in a sense like 'boarding', existed in the final paragraph of the 12th or 13th c treatise of Alexander Neckham *De Utensilibus*, printed (very inaccurately) in T Wright's *Vol of Vocabularies* 1857, pp 96–119, from MS Cott. Titus D 20, lf 48 b, where Wright has 'ut lingnum hujus pagine forti aderat tegminibus'; but the actual reading of the MS is 'ut lingnum *hic compagine* forti ad[h]ereat tegminibus'; so that the supposed *pāgina* 'boarding' has no existence.]

Characterized by, containing, or pertaining to ancient forms of life As introduced by Sedgwick, 1838, it was applied to the Cambrian and Silurian strata, as extended by Phillips, 1841, it comprises all the fossiliferous strata up to the Permian, the higher strata being Mesozoic and Cainozoic

1838 Sedgwick in *Q Jrnal Geol Soc* II 685 Class II or Palæozoic Strata Embracing all the groups of formations between Class I [Primary stratified rocks called by Sedgwick Protozoic] and the Old Red Sandstone and subdivided as follows 1 Lower Cambrian 2 Upper Cambrian 3 Silurian System. 1840 Phillips in *Lonny Cycl* XVI 469/2 We include in the term 'Palæozoic' all the generally argillaceous and arenaceous strata between the mica schist and the old red sandstone. *Ibid* XVII 154/1 The term Palæozoic may be retained, though it should be found that the application of it requires extension so as to include the carboniferous rocks or even the magnesian limestone. This indeed is not unlikely 1841 Phillips *Palæozoic Fossils Devon* 160, I have suggested the proposed titles Cainozoic Strata. Mesozoic Strata Palæozoic Strata Upper = Magnesian Limestone formation, Carboniferous System, Middle = (Old Red Sandst.) Delisle *Cabinet des Manuscrits* III 160) As to its popularity, the students of the University of Paris were rebuked because they preferred this erotic production to more edifying reading Pamphilus was also well known in England and is twice quoted or referred to by Chaucer, also by Gower *Mirour* 14449 (where see Editor's note) To connect the work with our pamphlet we have to suppose that here also as in France and the Low Countries, it was familiarly termed *Pamphilet* or *Panflet*, and that this name was in course of time extended to other opuscula produced or circulated 'in pamphlet form', i.e. as small detached works. This transference of sense must have been complete before 1340 when the name was applied in *Philobiblon* to what were evidently serious treatises, and before Thomas Usk, Hoccleve, and Lydgate applied it to single works of their own]

Some think it a (prehistoric) adaptation of L. *patina*, *patena*, in same sense (as **pat na*, **padva*, *panna*), but there are obvious difficulties. A med. (Ger.) L. *panna* occurs in 12th c. Pan (pæn), *sb.*[2] [a. Gr **Πάν**] The name of a Greek rural deity, represented as having the head, arms, and chest of a man, while his lower parts were those of a goat, of which he sometimes also bore the horns and ears.

The original seat of his worship was in Arcadia, and he was supposed to preside over shepherds and flocks, and to delight in rural music; he was also regarded as the author of sudden and groundless terror causing upon beasts or men (PANIC), in later times, from association of his name with πᾶν *all*, everything, the universe he was considered as an impersonation of Nature, of which his attributes were taken as mysterious symbols.

Pan, obs. form of PANE, obs. 5c form of PAIN

Pan-, combining form and formative element, repr Gr **παν-** from **πᾶν**, neuter of **πᾶς** all, which was freely used in Greek, esp with adjs to which it stood in adv. relation in the sense 'all, wholly, entirely, altogether, by all, of all', as in *πανάγαθον* altogether good, *πανάγιος* all holy, *πανακὴς* all-healing, *πανάριστον* best of all, *πανάρμενος* suited to all musical modes, *πανδήμιος* pertaining to all the people, public, *πανοπλία* fully-armed, *πανοπλίαρχος* of the full moon, *πάνσοφος* all-wise, so from national names, as *πανελλήνιος* of the Greeks, *πανώνιον* of all the Ionians, also in sbs., etc. derived from these adjs, and some other sbs., as *πανδέκτης* an all-receiver, *πανηγυρμὸς* ruler of all, *πανήγυρις* a universal or general assembly, *πανοπλία* panoply.

Hence *pan-* occurs in English in words taken or derived from Greek, and in many others formed more or less on the same analogy either in English, or of mod Latin, or French. It is especially common with national names, after *πανελλήνιος*, *πανιώνιος*, etc, where it has become a living suffix, prefixed whenever needed. Before a labial *παν-* became *παμ-*, and before a guttural *παγ-* (= *παγ-*), as *πάμφυλος*, *παμφυλήτης* beloved of all, *πάγγεραν* the sweetbread, the pancreas, the former of these is retained in some English derivatives (see PAM-).

The following are examples of the uses of *pan-*, the more important words will be found in their places as Main words

1 With national names, and words formed in imitation of them, with the sense 'Of, pertaining to, or comprising all (those indicated in the body of the word)', with sbs. in *-ism* and *-ist*, generally expressing the notion of or aspiration for the political union of all those interested in a cause which also tends to colour the adj. Of modern formations of this kind, PANSLAVISM and PANSLAVIST, with their related words, appear to have been the earliest. Among others are **Pan-Anglo-Saxon** *a.*, of or including all of 'Anglo-Saxon' race. **Pan-anthropological** *a.*, of all anthropological topics. **Pan-Arabic** *a.*, consisting of all the Arabs (*humorous*). **Pan-Buddhism** *a.*, of or embracing all Buddhists; so **Pan-Buddhism**. **Pan-Celtic** *a.*, of all Celts, or all the Celtic peoples, hence **Pan-Celticism**. **Pan-Christian** *a.*, universal Christian. **Pan-denominational** *a.*, of or embracing all religious denominations. **Pan-ecclesiastical** *a.*, representing a whole church or ecclesiastical body. **Pan-Gothic** *a.*, common to or including all the Gothic or Teutonic races or languages, Germanic. **Pan-human** *a.*, of or per-

6 *Scots Law* In the phrase *on* or *upon the panel* = upon (his, one's) trial Also, in later use, *in the panel*, etc
The original sense of *panel* here is conjectural It seems most probable that (on the analogy of sense 4) it meant a slip of parchment containing the indictment, or the name or names of the persons indicted *To be on the panel* would thus be *to be indicted*, and so on one s trial. It would also be easy to use the term elliptically for the name or names and so, the person or persons, on the panel, as in b, where it is that the word is collective In later times, the panel has been sometimes understood as a place, viz. that bar of the court (so Jamieson) or the dock Cf the phrases *to the panel*, to put or bring *into the panel*, to enter *the panel*

1 Another name for the Leopard (*Felis pardus*); popularly applied to large leopards

As with other exotic animals, the name, handed down from the Latin writers, was known long before the animal s all the early references merely reflect the statements of ancient authors and their mediæval continuators. These statements were long believed to refer to a beast distinct from the leo ard; a belief encouraged by there being two Latin names *panthēra* and *pardus*, as to the relation between which the ancient writers themselves were not clear, and by fabulous notions as to the generation of the leopard as a hybrid between the lion and the 'pard', and as to the sweet fragrance failed to be exhaled by the panther known to modern times (cf quot 1823) the panther was supposed to be at least a larger and m re powerful kind of leopard, a distinction not scientifically correct.

Papyrography (pæpăirŏ·grăfi) [f as prec + -GRAPHY] A term applied to a process of writing or drawing on paper and transferring the design to a zinc plate whence it is printed

The name had already been given in French (*papyrographie*) to various transfer processes introduced in 1819 1822 and 1829 respectively More recently it has been loosely applied in E. glish to Capten Abney s papyrotype etc

1848 H R. STRICKLAND in *Yarrell's Comb'n Ornith.* 90, I found that drawings made on paper with this [lithographic chalk] could be readily transferred to zinc, and would supply an indefinite nun ber of impressions. This new process, the re gnal Stone being made on paper, I have distinguished by the name of Papyrography. 1849 P H DE LA MOTTE (*title*) Anastatic Printing and Papyrography 1888 LIBTAN *Photographic Processes* 112 Capt Abney s Papyrography [Papyrotype]

2 In *Chemistry*, *para* is used to form

a. Names of substances that are (or have been supposed to be) modifications of those to the names of which *para* is prefixed, or that have been produced along with or instead of these, or, sometimes, that merely occur with them

This nomenclature appears to have been first used by Berzelius in 1830 (cf Poggendorf's *Annalen* XIX. 328 where he introduces *acidum paraphosphoricum* and *paraphosphates* also *acidum paratartaricum a. parastannicum*). In some cases the *para* derivatives are isomers or polymers of the simply named substance, e. g. *paraldehyde*, *paratoluene* but in others they are neither isomeric with nor closely related to them, e g *naphthalene* $C_{10}H_8$, *paranaphthalene* $C_{14}H_{10}$.

These may be converted by reducing agents into parachloraniline, parabromaniline, and para-iodaniline. **1889** *Anthony's Photogr Bull* II 270 We have called paradihydroxybenzene [or quinol] *one* of the benzenes, and the prefix *para* shows which one; there are two others, one of which is *ortho*-dihydroxybenzene or catechol, and the other *meta*-dihydroxybenzene or resorcinol. There are thus three substances, catechol, resorcinol and quinol, all having the same composition $C_6H_4(HO)_2$ and distinguished from each other by the prefixes *ortho*, *meta*, and *para* attached to dihydroxybenzene.

Parabanic (parăbæ·nik) *a Chem* [f PARA see below] In *parabanic acid*, a dibasic acid, $C_3O_3(NH.CO)_2$, produced by the action of nitric acid on uric acid or alloxan crystallizing in colourless prisms. When boiled with dilute acids, it is converted into oxalic acid and urea, whence it is sometimes called *oxalyl carbamide* or *oxalyl urea*. Hence **Pa·tubana**, a proposed substitute for the name *parabanic acid*, to express its parallelism to *alloxan* **Pa·rabanate**, a salt of parabanic acid, as *argentic parab nate* $C_3O_3(NAg.CO)_2$

(*Note* The term *parabia ic* was introduced by Liebig and Wöhler in 1838 (*Annalen* XXVI 289) but without any explanation of its formation As they made parabanic acid by a reaction in which they expected to obtain alloxan it is prob. that *para* was used in the sense instead of 'opposite to the ending being that of *allox an*, *-anic* and the *b* merely euphonic It has been suggested that the latter is a residue of *carb*, and that the term was formed to express parallelism of constitution to urea or carbamide $CO(NH_2)_2$ and to alloxan, $CO_2(NH.CO)CO$ but as a fact it was not till much later that the identity of urea and carbamide was discovered.]

1 A statement or tenet contrary to received opinion or belief, often with the implication that it is marvellous or incredible, sometimes with unfavourable connotation, as being discordant with what is held to be established truth, and hence absurd or fantastic, sometimes with favourable connotation, as a correction of vulgar error (In actual use since 17th c, though often insisted upon by writers as the proper sense.)

1. Those articles of personal property which the law allows a married woman to keep and, to a certain extent, deal with as her own

The word *paraphernæ* was used by the Roman jurists to indicate all property which a married w man *non fecit* held apart from her *dot* (dowry) property In the time the husband could exercise no rights without his wife s consent In most modern systems of law based on the Roman *para phernalia* is a term of *paraphernæ* means much the same thing but in English and Scottish Common law under which all personal or movable property of a wife vested *jure uxo ris* in the husband the *paraphernalia* became restricted to such purely personal belongings of a wife as dress, jewels, and the like. These latter were regarded as, in a sense, appropriated to the wife, and the husband s death they were not treated as part of his succession and the right of a trustee over them in the event of the husband s bankruptcy, was restricted But in neither England nor Scotland did *paraphernalia* strictly include articles in the nature of household furniture, even though these had been marriage presents to the wife The effect of the 'Married Women s Property Acts of 187 etc, will ultimately be to deprive the term of all significance in English and Scottish legal practice

1879 Bennett & Dyer in *Sachs Bot.* ii. 173 When the members of a spiral phyllotaxis with a constant angle of divergence stand sufficiently close to one another, spiral arrangements are easily seen and followed to the right and left which more or less conceal the genetic spiral. ‖ **Parasynthesis** (pærăsi·nθĕsis), *Philol* [mod a Gr *παρασύνθεσις*, f. *παρα-* beside + *συνθεσις* composition, Synthesis.] Derivation from a compound, conjoint combination and derivation, as a process of word-formation: see next

1866 Chandler *Gr. Accentuation* Pref. 20 It is said that synthesis does, and parasynthesis does not affect the accent which is really tantamount to saying, that when the accent of a word is known we shall be able to judge whether a Greek grammarian regarded that word as a synthetic or parasynthetic compound. 1884 *Amer. Trnl. Philol.* July 193 The principle of parasynthesis is more regularly and extensively developed here [in Portuguese] than in any other one of the Romance group of languages.

Parasynthetic (pærăsinpe·tik, *a* (*sb*) *Philol* [mod f. Gr. *παρασυνθετος* 'formed from a compound' (f. *παρα-* beside + *συνθετος* put together, compounded) + -ic. In mod k *parasynthétique*.] Formed from a combination or compound of two or more elements, formed by a conjoint process of combination and derivation. Also as *sb.* A parasynthetic formation or derivative

Applied esp in Romanic Philology, to verbs derived from a combination of preposition and stem with the addition of a verbal ending: *disembowel* from *dis-* and *bowel*; *embark*, *to put embowel* from *en dis* etc. Also to the derivatives of these, as *en table ment*, etc. Many of these parasynthetic derivatives have entered Eng. from French, e. g. *accoutrement*, *embarkation*, *endorse ment*, *imprisonment*, but native formations of this kind are rarely if ever made in Eng. Our parasynthetic derivatives are the conjoint of adjs. and nouns, formed by combining two words in some grammatical relation and adding to the combination a formative suffix: e. g. from *black eye*, *black-eyed*; from *all but*, *all-but-lete*; from *all ages*, *all-aged*; from *big end*, *big-ender*, from *free trade*, *free trader*; from *at home at homeish*, *at-homeishness*; from *gallant*, *gallantry*; from *bad black*, *badly*, *badness*; from *black* standing the hyphen are not formed from *black + eyed* or *big + ender* etc., but from *black eye + ed*, *big end + er*, etc., the *black* standing in the first formation is not in the element next to it but upon the combination of the two elements which of themselves, without the suffix, are only in gram matical connection.

1866 [see prec.] 1884 (April) *Amer. Philol. Assoc.* 28 *Comb.* a. In a similative relation passing into parasynthetic compounds as *ash-bellied*, *ash-colored*. 1884 A. M. Elliott in *Amer. Trnl. Pareira (pārē·rā) [ad Pg *pareira* vine trained against a wall, whence *pareira brava* wild climbing vine, the name given to the Brazilian plant.] A drug made of the root of a Brazilian shrub, used in disorders of the urinary passages
Originally understood to be the root of the climbing shrub *Cissampelos* or 'Velvet leaf'; the *pareira brava* of the Portuguese, whence the name, now said to be that of a different shrub, *Chondrodendron tomentosum*, the 'Velvet leaf' being distinguished by some as *Spurious Pareira*.

1 In the United Kingdom, and some of the Colonies, the name of a subdivision of a county applied to it primarily in its ecclesiastical aspect, but also as an area recognized for various purposes of civil administration and local government

The name occurs in Norman French in the Laws of William I, *c* 1075, but has not been found in Eng before the 13th c Although the parochial system was more or less developed in many (perhaps most parts of England before the year 1000 there is no word formed from *parochia*, nor any directly answering to it, in OE; the nearest equivalents being *preost-scīr* 'priest shire' (*Eccles Inst* xiv in Thorpe *Laws*) and *scrift scīr* 'shrift shire' (*Canons of Ælfric* vi, *Eccl Laws of Cnut* xiii) both of 11th or late 10th c., the latter rendered *parochia* in the 13th c L version

a *orig* A township or cluster of townships having its own church, and ministered to by its own priest, parson, or parish clergyman, to whom its tithes and ecclesiastical dues are (or originally were) paid. **b** A later division of such an original parish for ecclesiastical purposes only, having its own church and clergyman.

The latter includes the ancient *parochial chapelries* of some of the large northern parishes (CHAPEL 3 b, CHAPELRY 1) and the more recent ecclesiastical districts constituted under the powers given by the various Church Building Acts distinguished as *new ecclesiastical parishes* In Scotland these are called *parishes quoad sacra* while the original parishes which remain such for all purposes are *parishes quoad omnia.* The original parish when retained for civil, although subdivided for ecclesiastical purposes, is commonly distinguished as the *civil parish*, in Scotland a *parish quoad civilia.*

Most of the older colonies have parishes, both for ecclesiastical and civil purposes, frequently as electoral districts or divisions in the newer colonies where there is no established church the parish has often no official existence, though the Church of England (and in some cases other Churches) has applied the name to areas formed for the organization of its own work and the term is used in the same way by the Protestant Episcopal Church in the United States.

[Note (1) Of *παροικία* was the abstr sb from *παροικος* adj (*παρά* by beside + *οἶκος* house, dwelling) in sl Gr = dwelling beside or near, neighbouring a neighbour in LXX, N T and Christian writers, 'dwelling temporarily or sojourning in a foreign land a sojourner As to which of these notions was present when *παροικια* passed into ecclesiastical use opinions differ, the earlier etymologists (Iher, etc.) thinking it an 'the body of persons dwelling beside and hence the district lying about, a church or ecclesiastical centre; but more recent writers, founding their conclusions upon the usage of the LXX, N T and Fathers as the body of sojourners, holding the appellation to have been primarily applied to colonies of Jews of the Dispersion sojourning in Alexandria and other Gentile cities, and to have been from them continued or adopted as a name for 'the Christian brotherhood sojourning in a town or district, perh not without reference to the spiritual use of *παροικος, παροικια* (1 Pet i 17, ii 11) see Lightfoot *S Clement* II 6, Hatch in *Dict Chr Antiq* s v *Parish* (2) According to Light foot, *παροικια* was at first used in a much more general sense than its *παροικ* diocese of which it was later a synonym as were its L representatives *parœcia, parochia* down even to the 12th c The modern sense 'parish' appears already in St Basil *a* 379 Although *parochia* was used in the wider sense at the Councils of Celchyth A D 816, and Clovesho 825, and is so rendered even in 12th c glossaries (cf Wr Wülcker 537/10 *Diœcesis vel parochia*, bisopriche), *parish*, as an E (Anglish word), is found only with the modern meaning (exc when used, as later writers as a literal rendering of the Gr or L word sense 3) (3) The relation to the original *παροικος, parœcus*, of later and med L *gregorius*, presents difficulty The latter could not arise out of the former by any normal phonetic process and it has been suggested by various scholars independently that *parochianus* really a derivative from L *parochus* (= *παροικος*), the name of a local official in the country parts of Italy who supplied public personages with entertainment, etc, when they came into his district; and that this familiar term was popularly substituted for the unfamiliar *parœcus* Cf what is said under Parrock, as to the OHG rendering of *pari hus* by the appropriate *pfarrisse* (*pfarrisse*).]

3 The Great Council of the nation, which forms, with the Sovereign, the supreme legislature of the United Kingdom (formerly of the Realm of England), consisting of the three Estates, namely the Lords Spiritual and Temporal (forming together the House of Lords), and the representatives of the counties, cities, boroughs, and universities (forming the House of Commons). By some legal writers, the Sovereign, as part of the Legislature, is included in the Parliament, but this is not usual

a. Viewed as a temporary assemblage of persons, summoned by the Sovereign, and after a time (the length of which is not limited) again dissolved, to be succeeded (formerly at an uncertain and often distant interval, but now within a very short period) by another assemblage similarly constituted

This is, in its origin, merely a development of sense 2, corresponding to the gradual evolution of the modern parliament from the Great Council. Stubbs *Const Hist*, following the chroniclers, uses 'parliament' from 1242 onwards; but the 'parliaments' previous to 1295 belong rather to our sense 2, with progressive approaches to this sense

In this sense the word may be preceded by *a* or *the*, and have a plural; so we speak of a new parliament, or of the first, second, or third parliament of Edward I, or of Queen Victoria, and historians individualize many parliaments by distinctive appellations, as in 8.
